

Science

Key stage

In partnership with

Name:

Class:

Recycling and governance

Task brief

You are a group of scientists presenting to the government on the importance of recycling and the circular economy. Within your group you must decide who will be the following:

Lead Scientist

Team leader, able to help answer questions on all the below, and to encourage your team.

Economic Lead

Able to specialise on the economic impacts, both positive and negative

Emissions Lead

Research into the emissions caused by recycling processes, lorries etc

Biologist

Focusing upon the impacts on the wildlife if the country moved to a circular economy and the impacts at present

Recycling Advisor

Focus on the positives and negatives associated with recycling, you should be able to answer questions on the processes associated.

.....

You must present in detail on whether the country should move to a circular economy and whether any reductions in emissions are possible. The impacts on wildlife, habitats, and the wider environment must be considered. The impacts upon the population must also be focused on.
